

# Standard sinks

## Sinks and wash basins

The wide range of Hackman sinks provides a suitable solution for every purpose. All stainless steel construction is durable and easy to clean.

The construction of the sinks is deep drawn stainless steel 18/10 1.4301. As standard the sinks have 1½" (= 50 mm) bottom valve hole, location shown in the drawings. An overflow closing valve hole is an optional extra.

Special sinks according to customer's drawings are offered.
